## R.I.P. DON PERCH

### NASTY AVIATION VIRUS

The editor, along with others, was struck down by a virulent virus prior to a post operative medical for surgery to his right knee.

This virus has defied all antibiotics, cough drops, sleepless nights, lethargic behaviour.

The Bugle repeats the above picture as it is a visual, indication of how one felt, inflicted with a nasty virus and associated cough.

Many I have spoken too have felt worse than this incident, totally distraught and exhausted.

Knee surgery has been referred to a later date as a result

This edition of the Bugle is rather brief also as the computer crashed in a rather big way, with all the files unobtainable. As if the editor didn't have enough problems going from hospital to hospital for various tests and basically achieving any results of many miles.
